

Human Evolution

Australopithecus
Lived between about 3.8 and 3 million years ago in eastern Africa.

Homo Habilis
Lived between about 2.4 to 1.4 million years ago in south and east Africa.

Homo Erectus
The earliest examples lived about 1.8 million years ago in Africa and western Asia. The species may have survived as late as 200,000 years ago in Indonesia.

Homo Neanderthalensis
Lived from over 400,000 to about 40,000 years ago in western Eurasia.

Homo Sapien
Lived from about 300,000 years ago to the present, all around the world.
